## BEST SUMMER EVER

### InvisibleHand

[InvisibleHand](#) is a browser extension for Chrome, Safari, and Firefox. It sits in the background and waits until you start searching for flights, hotels, rental cars, or shopping items from one of its nearly 700 included retailers and 600 airlines. Then, it springs into action, showing you where cheaper prices can be found for that same search item. It's an unobtrusive way to save a little money here and there — especially if you're feeling too lazy to search a hundred discount sites yourself.
